

Date	Location/Workflow	Issue	Notes
7/27/2026	Scrapper Module	I need to be able to see the entire scraped gigs information before determining whether or not its spam or irrelevant	
	Gig Management	When do the gigs expire? We need to be able to set an expiration date so they can auto delete This needs to be done for manually entered gigs as well	
	Notifications	I am not sure that this is working; I sent a few and I didn't receive anything in my "musician" or "organizer" account	
	Case Type throughout Admin Dash/Musician/Organizer App	Please make this uniform; Do NOT allow lowercase words (e.g. opelousas vs Opelousas) I want all words to begin with an uppercase letter
