

OnlyGigz

Requirements and Questions Document

Executive Summary

This document outlines the legal & compliance requirements for the OnlyGigz platform, alongside operational, architectural, and financial questions identified through codebase analysis and client requirements.

The contents cover all four main system components:

- Musician Mobile App (apps/musician)
- Organizer Mobile App (apps/organizer)
- Web Admin Portal (web/admin_portal)
- Gig Scraper & Backend Engine (scraper & backend)

Part 1: Requirements (Legal, Compliance & Policy Documents)

To launch and operate OnlyGigz legally and securely, the following documentation and policies must be drafted and integrated into all client-facing applications:

1. Terms & Conditions (T&C)

- **User Accounts & Eligibility:** Rules governing account creation, verification, age requirements, and profile accuracy for both musicians and event organizers.
- **Platform Role:** Explicit statement that OnlyGigz acts as a venue/marketplace facilitating connections between musicians and event organizers, outlining liability limits.
- **Conduct & Acceptable Use:** Rules against spam, harassment, circumvention of platform payments, and fraudulent gig postings.

2. Privacy Policy

- **Data Collection & Usage:** Disclosure of personal data collected (name, email, location, payment info, audio clips, portfolio media, device metadata).
- **Third-Party Services:** Transparent disclosure of integrated services including Firebase (Auth, Firestore, Storage), Stripe (Payments & Connect payouts), and OpenAI/Gemini (AI classification).

- **Data Scraping Transparency:** Informing users how publicly available gig data is ingested, processed, and displayed on the platform.
- **Data Retention & Deletion:** Instructions for users on how to request profile deletion and data export in compliance with privacy regulations (GDPR / CCPA).

3. Terms of Service (ToS)

- **Service Agreements & Bookings:** Binding agreement terms between organizers and musicians upon gig acceptance.
- **Cancellation & Refund Policies:** Clear conditions for booking cancellations, refund eligibility, notice periods, and emergency no-shows.
- **Payment & Escrow Terms:** Terms detailing how funds are held prior to gig completion and released upon verification.

4. Copyright & Scraped Content Policy (DMCA / Fair Use)

- **External Scraped Gigs:** Legal notice explaining that scraped gig listings originate from public third-party sources (e.g., Facebook Marketplace, Craigslist).
- **Takedown Request Mechanism:** A clear process allowing original venue owners or gig posters to request removal of their scraped listing or claim ownership of their gig account on OnlyGigz.

5. Payment, Escrow & Payout Policy

- **Platform Service Fees:** Breakdown of service fees charged to musicians and organizers per transaction.
- **Stripe Connect & Payout Terms:** Requirements for Stripe onboarding, identity verification (KYC), bank payout schedules, and dispute/chargeback responsibilities.

6. About Us & Company Overview Document

- **Store Submission & Compliance:** Official company biography and mission statement required for Apple App Store and Google Play Store developer review and publication.
- **User & Partner Transparency:** Informational content explaining the OnlyGigz origin, core team background, marketplace values, and service offerings to users.

Part 2: Questions & Operational Decisions

Question 1: Scraped Gigs Workflow & Communication Bridge

Context: The Scraper module ingests publicly listed gigs from Facebook Marketplace, Craigslist, and other external sources. The original posters of these gigs are not registered users on OnlyGigz.

Focus / Impact: When an OnlyGigz musician applies to a scraped gig through the Musician app, the original external poster does not have an OnlyGigz account to receive notifications or view the applicant's profile.

Questions for Client:

- How should communication be established between an OnlyGigz musician and an external gig poster?
- Should OnlyGigz automatically send an email/SMS notification to the external contact with a **magic link** to view the musician's profile and accept/decline? **YES we want to send a magic link—what is your recommendation since we are scraping FB/Craigslist**
- Should the **platform invite the external poster to claim their gig** by registering on the Organizer app?
- Alternatively, should an OnlyGigz Admin act as a **liaison/relay to manually forward applications to external posters?**
- **Should musicians simply be redirected to the original external link (Craigslist / Facebook post) to apply directly on the external platform?**

Question 2: Support & Customer Service Chat System Across Apps

Context: In the Musician App (lib/screens/main/help_center_screen.dart & live_chat_screen.dart), a 'Live Chat' screen exists ('Sarah from Support'), but it currently operates with mock static data. In the Organizer App, there is currently no Help & Support screen. In the Web Admin Portal, there is no admin dashboard interface for support chats.

Focus / Impact: Unification and implementation strategy for customer support across apps.

Questions for Client:

- **Admin Portal Support UI: Should we build a real-time Customer Support Dashboard in web/admin_portal connected to a Firestore support_chats collection so admins can chat live with app users? YES USE THIS**
- **Organizer App Parity: Should we implement a dedicated 'Help & Support Center' screen in the Organizer App mirroring the Musician App? YES**
- Third-Party vs. Custom: Should we proceed with building custom Firestore live chat support, or integrate a third-party customer support widget (e.g., Intercom, Crisp, Zendesk)? **I have no idea what this is?**

Question 3: Scraper Module UI & Data Depth in Web Admin Portal

Context: Currently, on the Web Admin Portal (/scraper page), the 'Recently Imported Gigs' table displays minimal fields: Title, Source, AI Classification, Confidence Score, Flags, and Imported Date.

Focus / Impact: Admins approving or publishing scraped gigs cannot see the full details (pay range, duration, images, description, location) directly in the table or modal, nor can they preview the original listing link.

Questions for Client:

- Expanded Columns & Popup Details: Should the Scraper table / detail modal be upgraded to display all extracted fields including Budget/Pay Range, Event Date & Duration, Location/Venue, Cover Images, and Full Gig Description? **YES only with contact details and the original link if it can be added to it for only the admin to view? Admin should be able to view each scraped gig in its entirety.**
- **Original Listing Link: Should every scraped gig row feature a direct 'Original Source URL' button opening the original Craigslist/Facebook post in a new browser tab for admin verification before publishing? YES**
- **Auto-Publish Rules: Should scraped gigs with high AI confidence (e.g., >95%) be auto-published to the app, or should ALL scraped gigs require manual admin approval ('Show in App')? Can this be changed at a later date? For now I would like them all to be admin approved just until we kick off good**

Question 4: Two-Factor Authentication (2FA) Scope Across Platforms

Context: The Musician App includes a Two-Factor Authentication screen (two_factor_authentication_screen.dart) under Account Settings. Neither the Organizer App nor the Web Admin Portal currently features 2FA settings.

Focus / Impact: Scope and enforcement of 2FA across user roles.

Questions for Client:

- **Platform Scope: Is 2FA intended to be supported and enforced across all three platforms (Musician App, Organizer App, and Web Admin Portal)? YES ALL NEEDS TO HAVE 2FA**
- Admin Security: Given that the Web Admin Portal manages financial payouts, scraper engines, and user disputes, should 2FA be mandatory for Admin account logins? **YES**
- Authentication Method: Which 2FA mechanisms should be supported (SMS OTP via Firebase Phone Auth, Email OTP, or Authenticator App TOTP)? **SMS OTP**

Question 5: Financial Settlement in Admin Dispute Management

Context: In `web/admin_portal/src/app/(dashboard)/disputes/page.tsx`, resolving a dispute currently only changes the status flag or triggers user warnings/suspensions. It does not perform financial actions on held funds.

Focus / Impact: Financial resolution controls for disputed escrow funds.

Questions for Client:

- **Admin Financial Actions:** When an Admin resolves an open dispute, should the UI provide explicit financial controls (Full Refund to Organizer, Full Release to Musician, Custom 50/50 Split)? YES give me the controls I need
- **Automated Stripe Triggering:** Should resolving a dispute automatically trigger the corresponding Stripe Refund or Stripe Transfer API calls immediately? YES

Question 6: Featured Profile & Gig Upgrades (Monetization Engine)

Context: Both the Musician App (`featured_upgrade_screen.dart`) and Web Admin Portal (`/featured` route) include provisions for 'Featured Profile' and 'Featured Gig' placements.

Focus / Impact: Monetization model, pricing, and feed placement.

Questions for Client:

- **Pricing & Subscription Plans:** What are the pricing tiers for featured promotions (e.g. \$9.99/week, \$29.99/month)?

SUBSCRIPTION TIERS ENTERTAINERS

Feature	Opener	Mainstage (Best for working entertainers)	Headliner
Price	Free	\$29.99/mo or \$299.99/yr	\$49/mo or \$499/yr
OnlyGigz booking fee	12%	8%	2.5%
Opportunity access	24-hour delay	Instant	Instant + priority alerts
Applications	3 per month	Unlimited	Unlimited
Active applications	Up to 5	Unlimited	Unlimited
Profile visibility	Standard	Higher	Highest
Media	Basic portfolio	Expanded portfolio	Full portfolio
Calendar + availability	Included	Included	Included
Contracts + e-sign	Included when booked	Included	Included

Feature	Opener	Mainstage (Best for working entertainers)	Headliner
Verified reviews	Included	Included	Included
Lead insights	Limited (can only see a limited number of gigs in discovery screen)	Standard	Advanced
Support	Standard	Priority	Priority

FEATURED PROMOTIONS

Add-on	Suggested price	Audience	Value proposition
Featured Profile — 24 hours	\$4.99	Both sides	Short local visibility burst
Featured Profile — 7 days	\$14.99	Both sides	Top placement during a booking window
Featured Profile — 30 days	\$39.99	Both sides	Sustained discovery and badge
Boost This Gig	\$9.99	Organizers	More alerts and higher placement for 7 days
Urgent Fill	\$14.99	Organizers	Priority alert for short-notice openings
Profile Setup Service	\$49	Entertainers	Bio, categories, pricing, media organization
Pro Profile Makeover	\$99	Entertainers	Copy, positioning, media review, launch checklist
Additional team seat	\$8/mo	Venues/agencies	Controlled access for another staff member
Additional artist profile	\$5/mo	Agents/agencies	Expand roster without changing plans

*If these are feasible we would like to setup those as well for promotions

VENUE TIERS

Separate occasional event organizers from repeat venues on the pricing page. A wedding client should not have to interpret venue software pricing; a bar booking weekly entertainment should immediately see a volume benefit.

Feature	Gig Host	Venue Partner	Venue Pro
Price	Free	\$29.99/mo or \$299.99/yr	\$79.99/mo or \$799.99/yr
OnlyGigz booking fee	10% (cap \$399)	6%	1%

Feature	Gig Host	Venue Partner	Venue Pro
Gig posts	Up to 2 active	Unlimited	Unlimited
Team members	1	Up to 3	Up to 10
Saved talent lists	1	Unlimited	Unlimited
Recurring gig templates	No	Yes	Yes
Calendar + history	Basic	Full	Full + reporting
Contracts + e-sign	Included	Included	Included
Payment scheduling	Included	Included	Included
Priority posting	No	Standard	Priority
Support	Standard	Priority	Priority

Add-on rules

- Show the exact duration, placement, and badge before purchase.
 - State clearly that visibility does not guarantee applications or bookings.
 - Do not sell multiple overlapping boosts that confuse ranking fairness.
 - Stop the timer at the promised duration; do not auto-renew a one-time boost.
 - Make refunds and cancellation treatment consistent with the Pricing & Fees Policy.
- Payment Gateway: Should featured profile upgrades be billed via Apple In-App Purchase / Google Play Billing on mobile, or via Stripe Web Checkout? **Billed thru app store for those upgrades.**
 - Search Priority: How should featured musicians and gigs be prioritized in search and feed screens (top placement banner vs highlighted card styling)?

priority placement + highlighted card styling, but avoid a permanent banner that lets someone simply buy the entire top of the marketplace.

For a **musician searching gigs**, I'd rank primarily on:

Location + Date Availability + Category/Genre + Budget/Rate Fit + Reliability + Featured Boost

For an **organizer searching entertainers**:

Location + Availability + Entertainment Type + Rate Fit + Profile Quality + Reviews + Response/Booking History + Featured Boost

Question 7: Sharing Signed Digital Contracts with Users

Context: Digital contract signing is completed in-app via signature canvas, but there is currently no email or export mechanism to deliver a copy of the signed contract to the users.

Focus / Impact: Mechanism for delivering signed contracts to organizers and musicians.

Questions for Client:

- Contract Delivery: How should signed contracts be shared with the organizer and musician once signed?
- **Email Delivery: Should an automated copy of the signed contract be emailed to both parties upon completion? YES**
- **In-App PDF Download: Should users be able to download a PDF copy directly within the mobile apps, or keep it purely as an in-app text record? Should be able to view in app with option to download**

Question 8: Target Geographic Regions & International Rollout Scope

Context: Defining the geographical boundaries of the platform impacts payment currency, phone verification, legal compliance, and Stripe Connect capabilities.

Focus / Impact: Target operating countries, currency, and international rollout.

Questions for Client:

- Operational Countries: In which country or countries is the OnlyGigz app intended to launch and operate (e.g., **United States only**, Canada, UK, Australia, or Global)?
- Multi-Currency Support: Should the app support multiple currencies (**USD**, CAD, EUR, GBP) or strictly operate in a single currency (USD)?
- **Phone & Identity Verification: Are phone verification and identity checks restricted to domestic phone formats or open internationally? DOMESTIC USA ONLY**

Question 9: Platform Fee Percentage & Refund/Cancellation Policy

Context: The platform revenue model depends on commission fees collected during gig completion, as well as handling fee retention during cancellations.

Focus / Impact: Platform commission percentage, refund fee retention, and cancellation penalties.

Questions for Client:

- Commission Fee Percentage: What exact percentage (or fixed fee) will OnlyGigz deduct as a platform commission fee on every completed gig transaction?
-

- Refund Charges & Retention: Does the platform retain any administrative fee or percentage when a refund is processed for a cancelled job?
-
- Cancellation Rules: What are the penalty structures or non-refundable fee rules when an organizer or musician cancels a booking close to the event date?

Question 9: Platform Fee Percentage & Refund/Cancellation Policy

1. Commission Fee Percentage

OnlyGigz does **not use one universal commission percentage**. The platform fee is determined by the user's subscription tier.

Entertainer Platform Fees

Plan	Platform Fee
Opener	12%
Mainstage	8%
Headliner	2.5%

Organizer / Venue Platform Fees

Plan	Platform Fee
Gig Host	10% — capped at \$399 per booking
Venue Partner	6%
Venue Pro	1%

These percentages should be configurable from the administrative backend rather than hard-coded into the application.

The applicable platform fee should be calculated and clearly disclosed **before the user confirms the booking**.

Payment-processing fees, expedited payout fees, taxes, or other third-party charges should be treated separately from the OnlyGigz platform fee.

2. Refund Charges & Platform Fee Retention

OnlyGigz should distinguish between:

- the **entertainer's performance payment**
- the **OnlyGigz platform/service fee**
- applicable **third-party payment-processing fees**

Organizer-Initiated Cancellation

When an organizer cancels a confirmed booking, the amount refundable should depend on how close the cancellation occurs to the scheduled performance.

Any amount designated as a cancellation payment to the entertainer should remain subject to the applicable OnlyGigz platform fee.

OnlyGigz platform/service fees that have already been earned in connection with a confirmed booking should generally be **non-refundable**, except when OnlyGigz determines that a refund is appropriate because of platform error, duplicate payment, fraud, or another exceptional circumstance.

Any payment-processing fees that are not returned to OnlyGigz by the payment processor may also be deducted from the refund where legally permitted and properly disclosed.

Entertainer-Initiated Cancellation

If the entertainer cancels and the organizer did not cause the cancellation:

- The organizer should receive a **100% refund of the entertainer's performance amount** for services not performed.
- The organizer should not be charged an OnlyGigz cancellation penalty.
- OnlyGigz should refund its platform/service fee associated with the cancelled booking unless the cancellation resulted from organizer misconduct or another exception covered by platform policy.
- Non-refundable third-party processing charges may be handled separately where permitted and disclosed.

3. Organizer Cancellation Schedule

For a standard confirmed booking, use the following default cancellation schedule:

Organizer Cancels	Entertainer Receives	Refund of Performance Amount
More than 30 days before event	0%	100%
15–30 days before event	25%	75%
8–14 days before event	50%	50%
3–7 days before event	75%	25%
Less than 72 hours before event	100%	0%
Event day / No-show	100%	0%

The applicable OnlyGigz platform fee is retained/calculated against any amount ultimately paid to the entertainer.

4. Entertainer Cancellation Rules

Entertainer cancellations should be handled differently because the organizer purchased the performance expecting the entertainer to appear.

If an entertainer cancels:

Organizer: Receives a full refund for the cancelled performance.

Entertainer: Receives no performance payment.

The cancellation should also be recorded against the entertainer's account.

Repeated or late cancellations may result in:

- reduced search visibility;
- loss of Featured status;
- temporary restriction from applying for new gigs;
- account review; or
- suspension for repeated violations.

A genuine emergency or qualifying force-majeure situation may be reviewed separately.

5. Mutual Cancellation / Force Majeure

If both parties mutually agree to cancel, the entertainer and organizer may agree to:

- a full refund;
- a partial payment;
- rescheduling; or
- account credit where supported by OnlyGigz.

Force-majeure events such as severe weather, government restrictions, venue closure, natural disaster, or other circumstances outside either party's reasonable control should not automatically penalize either party.

OnlyGigz should allow administrators to manually override cancellation calculations when necessary.

6. Developer Implementation Requirements

Cancellation percentages, time windows, platform fees, refund eligibility, and fee caps **must be configurable through the OnlyGigz administrative backend and should not be permanently hard-coded.**

At cancellation, the system should:

1. Determine which party initiated the cancellation.
2. Calculate the number of hours/days remaining before the scheduled event.
3. Apply the appropriate cancellation tier.
4. Calculate the entertainer payout, organizer refund, and OnlyGigz fee separately.
5. Display the exact financial result **before the user confirms cancellation.**
6. Require the cancelling party to select a cancellation reason.
7. Record the cancellation timestamp, reason, refund, retained amount, platform fee, and responsible party.
8. Notify both parties of the cancellation and financial outcome.
9. Preserve the cancellation record for dispute and account-history purposes.

Example

A **\$1,000 performance** is cancelled by the organizer **10 days before the event.**

The 8–14 day cancellation tier applies:

- Original performance amount: **\$1,000**

- Entertainer cancellation entitlement: **50% = \$500**
- Organizer refund of performance amount: **\$500**
- OnlyGigz platform fee: calculated according to the applicable account tier and the amount actually retained/paid
- Any applicable non-refundable payment-processing costs: calculated separately

The cancellation confirmation screen must show these amounts before the organizer confirms the cancellation.

Important Principle

OnlyGigz should **protect entertainers from losing income because of last-minute cancellations while also protecting organizers when an entertainer fails to perform.**

The cancellation policy should be presented and accepted by both parties **before the booking becomes binding.**

Complete Requirements & Questions Summary Table

Category	Item	Current Codebase Status	Action Required
Legal	Terms & Conditions	Missing	Drafting & In-app integration
Legal	Privacy Policy	Missing	Drafting & In-app integration
Legal	Terms of Service	Missing	Drafting & In-app integration
Legal	Copyright / DMCA Takedown	Missing	Policy & Takedown Form creation
Legal	About Us & Company Overview	Missing	Drafting for Apple & Google App Store submission
Workflow	Scraped Gig Applications	Musician can apply in-app	Define communication bridge for external posters

Category	Item	Current Codebase Status	Action Required
Feature	Support Live Chat	UI exists in Musician app (mock data)	Build Admin Portal Support UI & Organizer App Support Screen
Feature	Scraper Admin UI	Table shows basic summary	Expand table/modals with full gig details & source URLs
Security	Two-Factor Auth (2FA)	Musician App UI only	Decide on 2FA scope for Organizer App & Web Admin Portal
Finance	Dispute Financials	Status toggle only	Add refund, release, and partial split actions to Admin UI
Revenue	Featured Upgrades	UI screen present	Define pricing tiers, billing method (IAP vs Stripe), and feed logic
Legal	Contract Delivery	Signature canvas present	Define email delivery or in-app PDF export for signed contracts
Scope	Target Regions	App configured for US	Define operating countries, currency, and international rollout
Finance	Platform Fee & Refund Policy	Escrow buttons wired	Define exact commission %, fee retention on refunds & cancellations
